

Figure 1 displays ten time series plots, labeled CH1 through CH7, STP, SC, TO, and RES, showing the evolution of a system over 24 hours. The x-axis represents time in hours, ranging from 0 to 24. The y-axis for each channel has a scale from 0 to 6. The traces show various patterns of activity, including step-like changes and oscillations, particularly around 10, 13, and 15 hours.
